

00 PROFILE

Full-stack engineer with 8+ years building high-performance, accessible web products for teams that ship fast. I lead frontend architecture, care about the 100ms that separates good from great, and have delivered interfaces used by 1.4M+ people across 42 shipped projects.

01 EXPERIENCE

Staff Engineer

VOLTLINE LABS

2021 — Present

- Lead frontend architecture for a fintech platform serving 1.4M users; own the design system, rendering performance budget and release tooling.
- Built Pulseboard, a streaming analytics dashboard rendering 50k live events per second with zero dropped frames, cutting time-to-insight from minutes to under two.
- Mentor a team of six engineers and run cross-team design and architecture reviews.

Senior Frontend Engineer

KINETIQ MEDIA

2018 — 2021

- Shipped Strobeworks, a browser-based motion editor with a 60fps timeline and GPU-accelerated preview, used by 30k+ designers.
- Rewrote the headless checkout behind Sprintcart for sub-second latency and an accessible path to purchase, lifting conversion 18%.
- Introduced real-time tooling for logistics and media clients using WebSockets and Rust services.
